

*****NOTICE*****

MARKSVILLE WATER SYSTEM CUSTOMERS

**ALL CUSTOMERS SERVED BY THE CITY OF MARKSVILLE WATER DEPARTMENT
DO NOT HAVE LEAD SERVICE LINES. THIS WAS DETERMINED BY A VISUAL
INSPECTION AT THE METER PIT OR BY THE YEAR THE SERVICE WAS INSTALLED.**

Public Water Supply (PWS) & Inventory Information	
PWS Name:	City of Marksville
PWSID:	LA1009011
Enter Date Planned to Report to LCR:	10/16/2024
Is this the Initial Inventory or an Inventory Update?	Initial Inventory
PWS's Preferred Point of Contact	Name: John Buckels II
	Phone: 318-305-4249
	Email Address: lbuckels@hotmail.com

Part 1: Historical Records Review	
Type of Record	Describe the Records Reviewed for Your Inventory
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	None
2. Construction Records, Ordinances, and Plumbing Codes <i>Examples: Codes, Ordinances or rules of services that prohibited lead piping, permits for installing or replacing service lines.</i>	None
3. Water System Records <i>Examples: Capital improvement plans, Standard operating procedures, Engineering standards.</i>	No documents show any lead service lines.
4. Distribution System Inspections and Records <i>Examples: Distribution system maps, Tap cards, Service line repair/replacement records, Inspection records, Meter installation records.</i>	
5. Other Records	

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

<input type="checkbox"/> Water meter reading	<input type="checkbox"/> Water main repair or replacement
<input type="checkbox"/> Water meter repair or replacement	<input type="checkbox"/> Backflow prevention device inspection
<input type="checkbox"/> Service line repair or replacement	<input type="checkbox"/> Other

If "Other", please explain:

2. Did you develop a policy or standard operating procedure to collect service line materials during routine activities?

Yes No

If "Yes", please describe:

I told all my workers to get pipe material on both sides of the meter when they on service calls. The pipe material is documented on the work orders.

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.34(a)(3)(iv), state approval is required. *Note that investigations are not required by the LCRB but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.*

<input type="checkbox"/> Visual Inspection	<input type="checkbox"/> Predictive Modeling
<input type="checkbox"/> Customer Self-Identification	<input type="checkbox"/> Statistical Analysis
<input type="checkbox"/> Mechanical Excavation	<input type="checkbox"/> Other
<input type="checkbox"/> Vacuum Excavation	

If "Other", please explain:

2. If the system utilized Predictive Modeling or Statistical Analysis, please briefly describe the process below:

Part 4: Inventory Summary Table¹
When you are using the Service Line Information worksheet, the classifications in the Column "Material Classification for the Entire Service Line" (Column M) will be used to calculate the total number of service lines for each of the four material classifications below.

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRB)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	3,037
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		3,037

Notes:
¹This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.
²A lead-lined galvanized service line is consistent with the definition of an LSJ under the LCRB ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSJ. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines.

Part 5: Public Accessibility

How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you must provide the inventory online.*

<input type="checkbox"/> Interactive online map	<input type="checkbox"/> Printed tabular data
<input type="checkbox"/> Static online map	<input type="checkbox"/> Information on water utility mailings or newsletter
<input type="checkbox"/> Online spreadsheet	<input type="checkbox"/> Hard copy information available in water system office
<input type="checkbox"/> Printed service line map	<input type="checkbox"/> Other

If "Other", please describe:

If the inventory is available online (i.e., system's website, etc.), provide a link to the website below:

www.cityofmarksville.com

PWSID (Autofill)	System Name(Autofill)	Street Address	City	State	Zip	Unique Service Line ID	System-Owned Service Line Material	Service Line Connector (i.e., Short connector used to connect service line to main. Under the propo Customer-Owned Service Line Material	Material Classification for the Entire Service Line(Autofill)
